

# GLASS DESIGNS STANDARD INDUSTRIAL MIRROR

## SPECIFICATION SHEET

### GD MIRROR

**PRODUCT:** 6mm or 4 mm Silvered Float Glass, Polished all Round, Foil Safety Backing

### DESCRIPTION:

- Completely lead-free top coat and <0.15% lead in the wet basecoat
- Excellent resistance to natural atmospheric corrosion
- Higher corrosion resistance and improved protection to chemical attack from cleaners and certain adhesives than conventional mirrors
- Easy to handle, install and process
- Available in a range of sizes
- Environmentally friendly manufacturing process produces less waste and ensures easier onward recycling
- Manufactured to EN1036
- Easily surpasses durability and sight acceptance tests in the product standard
- Provides good level of Light and Reflection.

### SAFETY BACKING

All Mirrors are covered with an industrial standard foil Safety film which protects the silvering against adhesive attack, keeps the mirror protected from moisture corrosion and gives the mirror structural stability in the case of breakage.

**MIRROR COLOURS:** Standard Silver Finish, Bronze and Grey Finish

**QUALITY:** Available in Standard Float Glass or Low Iron Glass
