Glass Designs Ltd have developed a full range of frameless glass shower doors and screens specifically designed for the residential, hospitality and leisure markets.

Having the ability to manufacture and process in house at our facility in Greenwich, meets the demands for today's fast, competitive and ever changing market. These three factors have established Glass Design Ltd as the architects choice and the principal contractors preferred supplier.

Providing versatility and individuality, our frameless shower collection can be tailored to suit your exact requirements. If your ceiling is sloped or your wall is at an angle, we can create a custom made frameless shower screen in almost any shape or size, no matter how unusual.

Trading for over 75 years, you can rely on the quality, service, reliability & personal touch that has secured Glass Designs continued success.

Weight	Door Width
40kg	762mm

*NOTE: Do not exceed maximum door weight or width.

SHOWER GLASS

WARM, SUBTLE TO CRYSTAL CLEAR

Specialising in 10 mm Toughened glass, our range of finishes extent from the traditional clear glass to the subtle bronze or grey tints. Also included are satin finishes which offer perfect privacy to the finished product.

LOW IRON GLASS

Glass in which most of the iron oxide has been removed at the time of production. The clarity is better than that of regular glass. Available in 8mm and 10mm.

STANDARD FLOAT GLASS

Float glass uses standard glass making raw materials which gives a more noticeable green tint to the edge of the glass. Available in 8mm and 10mm.

SATIN ACID

The satin-smooth, translucent finish of Satin Acid obscures the view through the glass while maintaining a high level of light transmittance. Available in 10mm.

SANDBLAST

This is often confused with etching. Sandblasting is the process of blasting the surface of glass with grit which peppers the surface giving a milky white appearance. Using this process also allows any design/modesty screen to be permanently applied to the glass. Available in 8mm and 10mm. (Ritec protection always added as standard)

BRONZE FLOAT

Coloured glass is produced by adding impurities in the sand mixture that is used to manufacture the glass. This process allows the glass to bring warmth and depth to shower glass. Available in 10mm.

GREY FLOAT

Coloured glass is produced by adding impurities in the sand mixture that is used to manufacture the glass. This process allows the glass to bring warmth and depth to shower glass. Available in 10mm.

NUVOLA MIST SHOWER GLASS

DISCRETION ASSURED

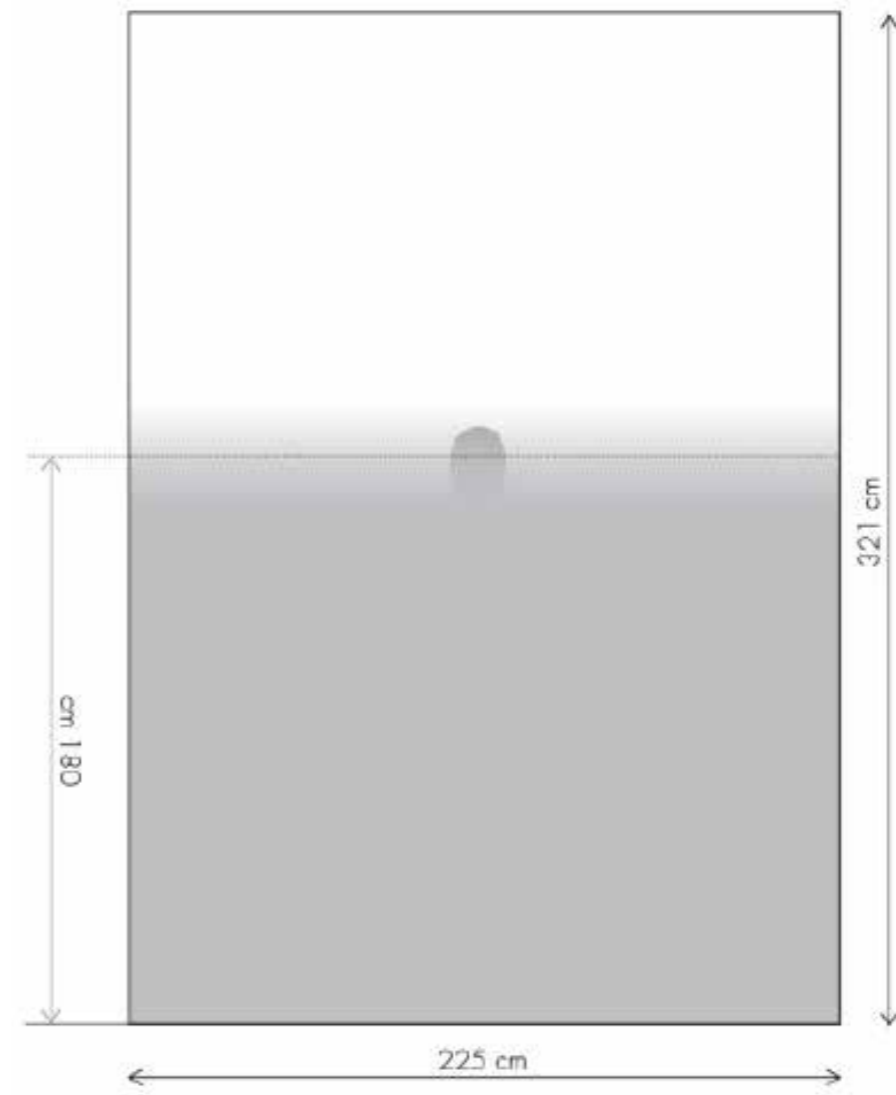

A gradual fine satin finish from opaque to clear is the perfect solution for the high end market to complete the luxurious feel.

NUVOLA MIST SHOWER GLASS

madras®
vitrealpecchi

Vitreal Specchi Nuvola Mist Shower Glass is rendered partially opaque on one side by a satin finish that very subtly graduates until it disappears, leaving the rest of the glass transparent. The part of the glass where the finish is most opaque effectively veils vision. The treated surface is smooth to the touch and its extremely low porosity ensures its resistance to fingerprints and scratches, as well as making it very easy to clean.

from smears and bacteria.*

CLEARSHIELD GLASS PROTECTION ANTI PLAQUE

RITEC

'Non-stick' ClearShield Eco-Glass™ is a unique type of glass that works similar to 'non-stick' cookware. Its durable protective barrier gives you several benefits...

- Resists staining from hard water deposits
- Saves cleaning time and effort
- Keeps your shower looking like new
- Creates a more hygienic environment

Unprotected glass can quickly and easily suffer permanent bonding of limescale/mineral salts onto its surface, causing staining and physical damage. Water spots become very difficult, if not impossible, to remove despite regular cleaning. As a result, the appearance and hygienic environment of the shower are spoiled. Harsh and abrasive cleaning methods and compounds create further damage and accelerate the degradation process.

Unlike ordinary unprotected glass, the surface of ClearShield Eco-Glass™ is chemically non-reactive and 'non-stick'. This means limescale and other dirt will build up only half as fast, and will not bond to the glass. Cleaning is now a very simple task. Additionally, ClearShield Eco-Glass™ is independently proven to keep glass hygienically clean by reducing bacterial growth.

ClearShield Eco-Glass™ is used in a wide range of domestic, commercial, industrial and marine applications. It has received major awards and recognition because of its outstanding performance, even in the harshest of environments.

ClearShield Eco-Glass™ is powered by ClearShield®, a unique polymeric resin with over 35 years of proven track records. ClearShield® can be re-applied in situ if necessary.

Caring for ClearShield Eco-Glass™
Cleaning your shower glass no longer requires harsh and abrasive materials that may be harmful to you and the environment. After-Care for Shower Glass has been specially developed to maintain the maximum performance of ClearShield Eco-Glass™. Using this highly effective all-in-one cleaner, disinfectant and enhancer in a simple and regular manner maximises the benefits of ClearShield Eco-Glass™.

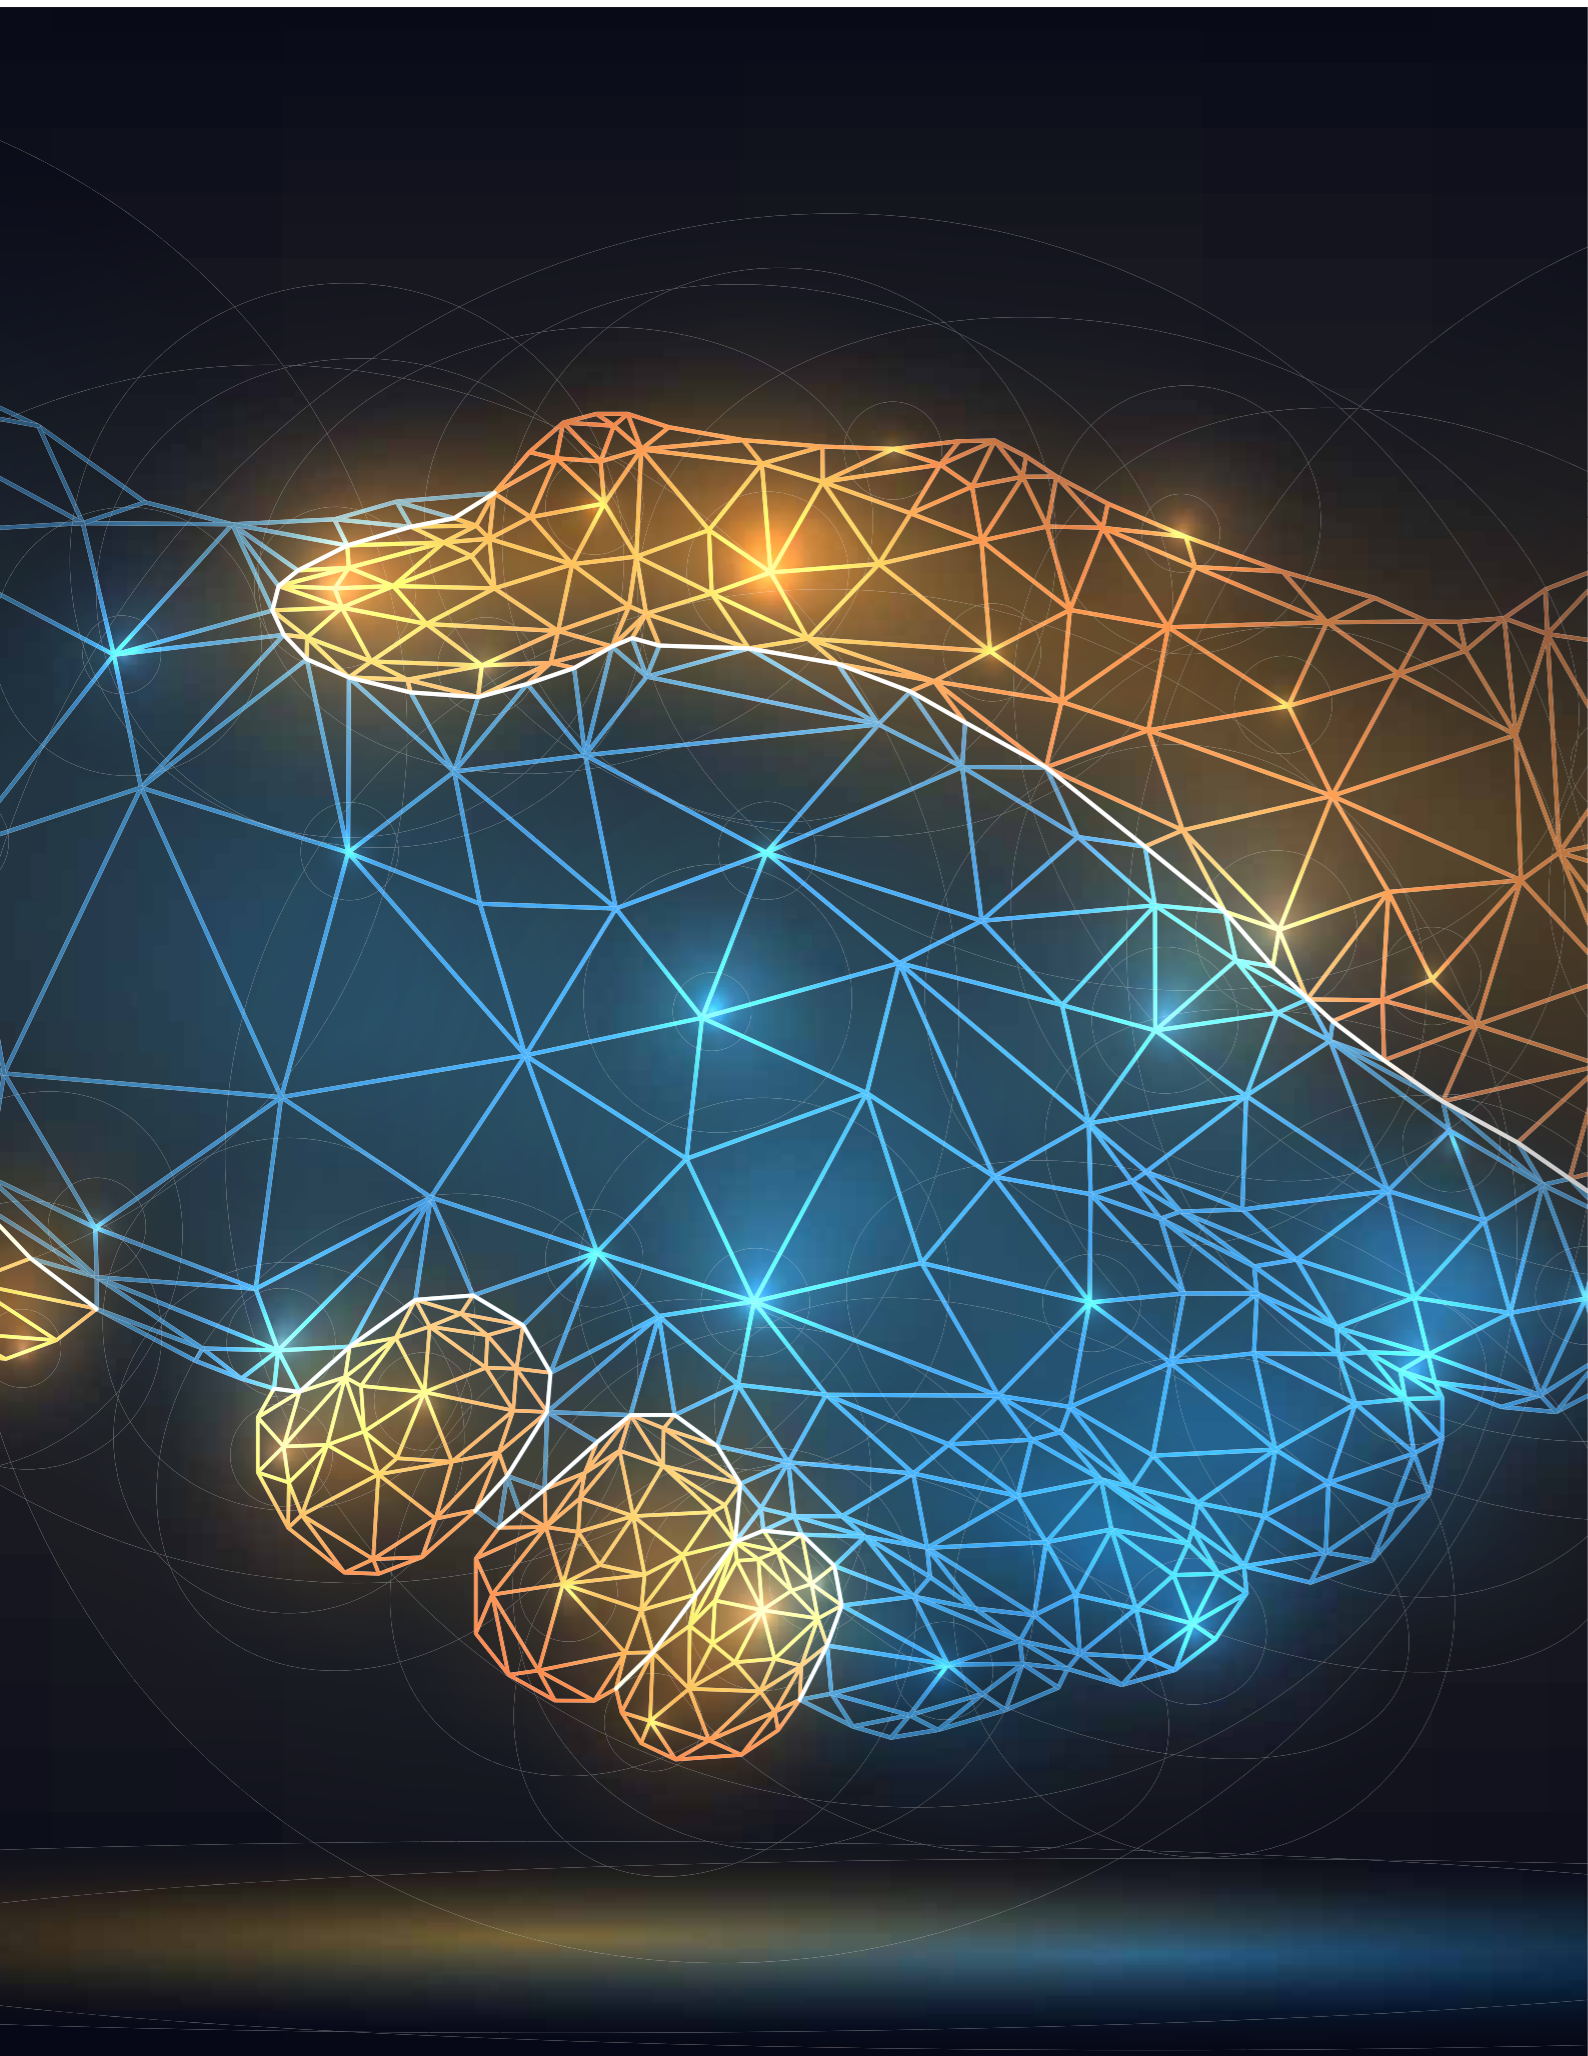

Protect your investment... ask for ClearShield Eco-Glass™!

SUPPLY CHAIN

SERVICE IS KEY

We consider our supply chain to be a very important and integral part of our quality products and services. Our relationships are a key factor to our continued success.

CRL EUROPE

CRL is the global leading supplier to the glazing, railing, architectural and construction industries. Offering more than 60,000 products, the company designs, engineers and manufactures a wide variety of architectural hardware such as frameless shower door hardware, commercial and residential railings, hardware for “all-glass” commercial entrances.

It also supplies daily tools and accessories for professional glazers. CRL stands out for its constant availability of products and outstanding services.

BOHLE GROUP

The Bohle Group is one of Europe’s leading manufacturers and wholesalers of tools, machinery and accessories for glass processing and glass finishing. Quality is the leading principle at Bohle - in every area. To live up to this requirement, the company develops and manufactures many products themselves. A modern logistics centre quickly sends the ordered goods on their way to the customer.

RITEC

Ritec’s revolutionary new ClearShield Eco-System™ for glass is the first and only technology with performance, added value and profit guaranteed at every step of the glass supply chain - specifier, processor, fabricator, contractor, installer, end user. The ClearShield Eco-System™ for glass is unique because it offers proven performance and durability.

AGC

AGC Glass Europe is an international group based in Brussels which produces, processes and distributes flat glass for the construction industry (external glazing and indoor decorative glass), the automotive industry, solar applications and certain specialized industries (glazing for railway and subway cars and ships, glass for domestic appliances, and various high-tech applications). It is the European branch of the AGC group (Asahi Glass Co., Ltd).

PILKINGTONS

The company was founded in 1826 as a partnership between members of the Pilkington and Greenall

families, based in St Helens, Lancashire. The venture used the trading name of St Helens Crown Glass Company.

On the departure from the partnership of the last Greenall in 1845, the firm became known as Pilkington Brothers. In July 1894 the business was incorporated under the Companies Act 1862 as Pilkington Brothers Limited.

VITREALSPECCHI

Vitrealspecchi is an Italian company specializing in satin glass and other chemically etched flat glass products, which it has marketed under the Madras® brand since 1968. Its unique experience in the sector enables it to transform float glass - whether monolithic, laminated, silvered or lacquered - into prestige materials for Architecture and Design.
