GLASS DESIGNS STANDARD SAFETY MIRROR

SPECIFICATION SHEET

GD LOW IRON MIRROR

PRODUCT: 6 mm Silvered Float Glass, Polished all Round, Foil Backed to Safety level C

DESCRIPTION:

- Completely lead-free top coat and <0.15% lead in the wet basecoat
- Excellent resistance to natural atmospheric corrosion
- Higher corrosion resistance and improved protection to chemical attack from cleaners and certain adhesives than conventional mirrors
- Easy to handle, install and process
- Available in a range of sizes
- Environmentally friendly manufacturing process produces less waste and ensures easier onward recycling
- Manufactured to EN1036
- Easily surpasses durability and sight acceptance tests in the product standard
- Provides good level of Light and Reflection.

SAFETY BACKING

All Mirrors are covered with self-adhesive foil film which protects the silvering against adhesive attack and keeps the mirror protected from moisture corrosion.

SAFETY IMPACT STATUS

Class B impact resistance.

MIRROR COLOURS: Standard Silver Finish, Bronze and Grey Finish
